

Organic Bakery Ingredients

Trusted organic solutions, created by Corbion

- ▶ Easy to use
- ▶ Appeal to growing consumer demand
- ▶ Maintain quality and functionality

With today's increased interest in healthy living, consumers are more aware and informed about the ingredients in the food they eat than ever before. As a baker, this means you need options, which is why Corbion offers a vast array of Organic ingredients you can trust.

What makes a product Organic?

USDA organic products have strict production and labeling requirements, and must meet the following requirements:

- Produced without excluded methods, (e.g., genetic engineering, ionizing radiation, or sewage sludge).
- Produced using allowed substances.
- Overseen by a USDA National Organic Program-authorized certifying agent, following all USDA organic regulations.

If you make a product and want to claim that it or its ingredients are organic, your final product needs to be certified. For complete information regarding Organic product certification, please visit:

www.ams.usda.gov/rules-regulations/organic

Organic Labeling Standards

The rules for labeling organic retail products, both raw and processed, are addressed under the "Product Composition" section of the USDA organic regulations.

The four categories of labeling based on product composition & the labeling specifications for each are summarized in the Organic Categories chart.

Organic Categories

100% Organic

"100 percent organic" can be used to label any product that contains 100 percent organic ingredients (excluding salt and water, which are considered natural). Most raw, unprocessed farm products can be designated "100 percent organic." Likewise, many value-added farm products that have no added ingredients—such as grain flours, rolled oats, etc.—can also be labeled "100 percent organic."

Organic

"Organic" can be used to label any product that contains a minimum of 95 percent organic ingredients (excluding salt and water). Up to 5 percent of the ingredients may be nonorganic agricultural products that are not commercially available as organic and/or nonagricultural products that are on the National List.

Made with Organic

"Made with Organic ____" can be used to label a product that contains at least 70 percent organically produced ingredients (excluding salt and water). There are a number of detailed constraints regarding the ingredients that comprise the nonorganic portion.

Specific Ingredient Listings

The specific organic ingredients may be listed in the ingredient statement of products containing less than 70 percent organic contents—for example, "Ingredients: water, barley, beans, organic tomatoes, salt."

Organic Bakery Ingredients

Trusted organic solutions, created by Corbion

Whether it's functional blends, mixes and bases, or frozen items, Corbion has a solution that will allow you to create Organic products that satisfies your needs as well as your customers.
