# Pre-soaked grains

A fresh approach to incorporating ancient and whole grains

- ▶ Achieve healthier label claims
- ▶ Appeal to today's consumers
- ▶ Enhance familiar products
- ▶ Reduce waste and save money

With the health and wellness movement driving sales, consumers are reading labels before they buy. Do your labels tell the right story? With pre-soaked grains from Corbion, it's easier than ever to incorporate the ingredients health-conscious consumers crave. Take advantage of the opportunity. Add ancient and whole grains into your recipes and watch sales of baked goods rise.

## Hitting the health halo

A few years ago, if you mentioned the word quinoa, consumers didn't know what it was - many couldn't pronounce it, much less cook it. Today, thanks to the health and wellness movement, quinoa is becoming a kitchen staple.

And, this ancient grain isn't alone. According to Corbion's proprietary research, as consumers become more educated on ancient grains, **more than one-third indicate strong purchase intent**. That's good news for quinoa and other ancient grains, such as amaranth, spelt and millet.

These ancient grains fit today's demand for healthful, whole-grain products. Unlike commodity grains, ancient grains have remained virtually untouched by modern science over the last few centuries. As a result, in addition to boosting label appeal, ancient grains have better flavor and texture profiles than modern or processed grains.

Adding these ancient whole grains to product formulations helps you re-energize the bread category and re-engage consumers.

# Pre-soaked grains

A fresh approach to incorporating ancient and whole grains

Corbion offers a variety of products solutions that allow bakers to easily incorporate ancient and whole grains into their finished products. Our hydrated and super soaked grain lines are pre-soaked, making the outer shell of the grain soft and ready for consumption. The shelf life of our pre-soaked products is also longer under refrigeration, which reduces waste and saves money.

Product name	SKU	Description	Usage rate	Weight	Package
