PURASORB® PC 17
Product data sheet

Description
PURASORB PC 17 is a GMP grade homopolymer of ε-Caprolactone with an inherent viscosity midpoint of 1.7 dl/g. It is supplied in the form of white to light tan granules. PURASORB PC 17 is primarily used for medical device applications and is suitable for all commonly used polymer processing techniques.

For each batch a certificate of analysis is provided, showing the analytical data determined in our quality control laboratory. Additional analytical data can be made available upon request.

Physical-chemical properties
Molecular formula
\((C₆H₁₀O₂)ₙ\)

Chemical name
poly[2-oxepanone]

CAS Registry number
24980-41-4

Packaging
PURASORB PC 17 can be supplied in 1 or 5 kg packages. Normal packaging consists of an inner bag of clean room grade PE and an outer bag of aluminum coated polyester-PE laminate. The packed product is shipped in an additional bag of PE and in PE containers for added protection.

Storage & Handling
When stored in the original packaging at low temperatures (-15°C), PURASORB PC 17 keeps its initial properties for five years.

Allow the material to reach room temperature before opening the packaging. After opening the original packaging PURASORB PC 17 is best stored in an inert atmosphere and at low temperatures (-15°C).
